Digital Capitalism Dan Schiller, 1999 Schiller explores how corporate domination is changing the political and social underpinnings of the Internet. He argues that the market driven policies which govern the Internet are exacerbating existing social inequalities.

El Universo y la taza de té K. C Cole, 1999-07-01 K. C. Cole desmitifica el poder de los numeros y concede a las matematicas su verdadero valor en EL universo y la taza de te, un libro fascinante que nos lleva a replantearnos la validez de axiomas tan conocidos como la teoria de la relatividad, el teorema de Fermat o la ley del tercio excluso. Los lectores se preguntaran hasta que punto las matematicas son una ciencia exacta y en que medida pueden ayudarnos a comprender nuestra propia vida. Los circulos perfectos y los angulos rectos no existen en la naturaleza. El ser humano invento las matematicas, pero esta limitado para su comprension. Nuestro cerebro parece haber sido calibrado como las escalas utilizadas para medir los seismos, en las que un pequeno incremento representa un aumento enorme del poder destructivo. Esta peculiaridad acaso explique la incapacidad de las personas para comprender la autentica diferencia entre un millon y un billon. No obstante, es imprescindible aprender como funcionan los numeros para entender mejor cuanto nos rodea, desde aspectos de la fisica hasta metodos para lograr acuerdos mas justos en los divorcios. Las matematicas son un lenguaje que nos autoriza a traducir la complejidad del mundo en pautas manejables

Mastermind Maria Konnikova, 2013-01-03 The New York Times bestselling guide to thinking like literature's greatest detective. Steven Pinker meets Sir Arthur Conan Doyle (Boston Globe), by the author of *The Confidence Game*. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary

intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in *Mastermind* she shows us how. Beginning with the “brain attic”—Holmes’s metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, *Mastermind* explores Holmes’s unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world’s most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

Place to Space Peter Weill, Michael Vitale, 2001-05-28 *Place to Space* is the essential e-business playbook that will give leaders the insight and confidence they need to operate successfully in both place and space. The book explains how traditional companies can adapt their bricks-and-mortar legacies to complement and bolster their online ventures. Based on extensive research into dozens of e-business initiatives, this book provides the first systematic, practical analysis of eight viable e-business models; an adaptable hybrid model for competing against online pure plays; and revolutionary schematic tools for analyzing current business models and evaluating promising new web initiatives. Through illuminating case studies of Lonely Planet, General Electric, CDNow, Reuters, and others, the authors show how each model works in practice—from how it makes money to the core competencies and critical factors required to implement it.

Evaluating Philosophies Mario Bunge, 2012-07-04 The first part deals with philosophies that have had a significant input, positive or negative, on the search for truth; it suggests that scientific and technological are either stimulated or smothered by a philosophical matrix; and it outlines two ontological doctrines believed to have nurtured research in modern times: systemism (not to be mistaken for holism) and materialism (as an extension of physicalism). The second part discusses a few practical problems that are being actively discussed in the literature, from climatology and information science to economics and legal philosophy. This discussion is informed by the general principles analyzed in the first part of the book. Some of the conclusions are that standard economic theory is just as inadequate as Marxism; that law and order are weak without justice; and that the central equation of normative climatology is a tautology—which of course does not put climate change in doubt. The third and final part of the book tackles a set of key concepts, such as those of indicator, energy, and existence, that have been either taken for granted or neglected. For instance, it is argued that there is at least one existence predicate, and that it is unrelated to the so-called existential quantifier; that high level hypotheses cannot be put to the test unless conjoined with indicator hypotheses; and that induction cannot produce high level hypotheses because empirical data do not contain any transempirical concepts. Realism, materialism, and systemism are thus refined and vindicated.

Towards a Visual Culture Caleb Gattegno,2010-03-25 Originally released in 1969, *Towards a Visual Culture* is a remarkably relevant read for today's teachers and programmers. Although the technology has evolved, humans remain visual learners and television remains a visual medium. In this book, Gattegno provides a framework for developing effective and efficient educational programs in an optimistic, forward-thinking manner. He foresees technology able to transmit all knowledge into all homes through satellites and computers, and urges educators and programmers to take advantage of the immense opportunities therein. The media are truly interchangeable - our eyes, our ability to perceive, and our awareness will always be the greatest educational tools.

The Crystal Children Doreen Virtue,2003-06-01 *Crystal Children* reflect the new generation that has come to the Earth plane after the *Indigo Children*. They are approximately ages 0 through 5, although some members of the first wave of

Crystal Children are as old as 7. These children are like Indigos—highly psychic and sensitive—but without the dark edge and the anger energy. The term Crystal Children is already taking hold worldwide, and people everywhere are talking about these special kids. Since Doreen is the only researcher who is publicly giving speeches on the subject, her audiences have been asking her for a book on the topic. It's a natural sequel to her book *The Care and Feeding of Indigo Children*. As babies, Crystal Children may take longer than normal to begin talking. They are highly telepathic, and their tuned-in mothers communicate with them nonverbally. Because they're so sensitive, the Crystal Children babies may fuss and cry a lot in crowded places. They're also very fond of nature. Doreen once watched one Crystal Child walk from tree to tree, giving each one a big hug. Crystal Children are beautiful inside and out, like magnificent little high-priests and priestesses. One look in their eyes, and you'll recognize Divine love and wisdom. Their auras are bright, radiant, and opalescent—they seem to glow from the inside! They talk about past lives, distant galaxies, and profound insights concerning peace and love. Most Crystal Children's parents are aware that their kids are special, and they're thrilled to be parenting such delightful children. The book includes many interviews with Crystal Children, their parents, and teachers. It discusses parenting and teaching methods that are essential to keeping these children happy and healthy, and how to avoid pitfalls that could spoil their special gifts.

Bank 3.0 Brett King, 2012-11-19 The first edition of *BANK 2.0*—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In *BANK 3.0*, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. *BANK 3.0* shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. —Gerry McGovern, author of *Killer Web Content*

Devoted to Death R. Andrew Chesnut, 2018 R. Andrew Chesnut offers a fascinating portrayal of Santa Muerte, a skeleton saint whose cult has attracted millions of devotees over the past decade. Although condemned by mainstream churches, this folk saint's supernatural powers appeal to millions of Latin Americans and immigrants in the U.S. Devotees believe the Bony Lady (as she is affectionately called) to be the fastest and most effective miracle worker, and as such, her statuettes and paraphernalia now outsell those of the Virgin of Guadalupe and Saint Jude, two other giants of Mexican religiosity. In particular, Chesnut shows Santa Muerte has become the patron saint of drug traffickers, playing an important role as protector of peddlers of crystal meth and marijuana; DEA agents and Mexican police often find her altars in the safe houses of drug smugglers. Yet Saint Death plays other important roles: she is a supernatural healer, love doctor, money-maker, lawyer, and angel of death. She has become without doubt one of the most popular and powerful saints on both the Mexican and American religious landscapes.
