Journey to the Centre of the Earth Jules Verne, 2008-06-12 Journey to the Centre of the Earth has been consistently praised for its style and its vision of the world. It explores the prehistory of the globe, but can also be read as a psychological quest, for the journey itself is as important as arrival or discovery. Professor Lidenbrock and his nephew Axel travel across Iceland, and then down through an extinct crater towards a sunless sea where they enter a living past and are confronted with the origins of man. A classic of nineteenth-century French literature, the novel's distinctive combination of realism and Romanticism has marked figures as diverse as Sartre and Tournier, Mark Twain and Conan Doyle. This new translation of the complete text is faithful to the lyricism, verve, and humour of the original. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Bite-Sized Operations Management Mark S. Daskin, 2021-09-29 This text is an introduction to Operations Management. Three themes are woven throughout the book: optimization or trying to do the best we can, managing tradeoffs between conflicting objectives, and dealing with uncertainty. After a brief introduction, the text reviews the fundamentals of probability including commonly used discrete and continuous distributions and functions of a random variable. The next major section, beginning in Chapter 7, examines optimization. The key fundamentals of optimization—inputs, decision variables, objective(s), and constraints—are introduced. Optimization is applied to linear regression, basic inventory modeling, and the newsvendor problem, which incorporates uncertain demand. Linear programming is then introduced. We show that the newsvendor problem can be cast as a network flow linear programming problem. Linear programming is then applied to the problem of redistributing empty rental vehicles (e.g., bicycles) at the end of a day and the problem of assigning students to seminars. Several chapters deal with location models as examples of both simple optimization problems and integer programming problems. The next major section focuses on queueing theory including single- and multi-server queues. This section also introduces a numerical method for solving for key performance metrics for a common class of queueing problems as well as simulation modeling. Finally, the text ends with a discussion of decision theory that again integrates notions of optimization, tradeoffs, and uncertainty analysis. The text is designed for anyone with a modest mathematical background. As such, it should be readily accessible to engineering students, economics, statistics, and mathematics majors, as well as many business students.

Metropolis 1890-1940 Anthony Sutcliffe, 1984-02 An ideal and welcome reference and reader for students of urbanism, Metropolis 1890-1940 examines perceptions of the city during the dramatic urban growth of this period. Metropolis looks at the policies adopted to deal with the new city and at the views of the city expressed in the art, architecture, literature, cinema, music, and ideology of the time. Internationally known experts discuss case studies of London, Paris, Berlin, the Ruhr, New York, Moscow, and Tokyo, and a postscript brings the reader up to date with a survey of postwar urbanism.

Carole Landis E.J. Fleming,2015-09-11 Before she was a glamorous actress, before she was a war-time pin-up star, even before she was Carole Landis, she was Frances Lillian Ridste, an insecure young girl from Wisconsin. She was strikingly beautiful, talented, and on her way to becoming a movie star, yet she spent her entire life searching for love. Though she appeared in more than 60 films during her short career, Landis was better known for her extraordinary beauty and many romantic relationships than for her acting or comedic timing. Like many starlets of the time, Landis worked her way up from uncredited bit parts (and according to rumors, from the casting couch) to leading roles in such films as *Topper Returns* (1940) and *My Gal Sal* (1942) over the course of her 11-year career. She spent more time visiting troops during World War II—traveling hundreds of thousands of miles and coming near death twice—than any other Hollywood star. Despite her seemingly glamorous and carefree life, Landis was unable to build a lasting relationship, a fact that contributed to her suicide at 29. This work examines Landis's life and career in Hollywood, focusing on how her movie career affected her short, unhappy life.

Stuffing My Stocking 4 Horsemen Publications,2021-12 No one ever said the holiday season didn't come with its share of fun. Whether you were hoping for something naughty or nice, there's a sexy story here for everyone. Office shenanigans, snow covered days, and even a little alone time with a significant other. Santa is making a list, and the toys on this one are well paired for kinky, steamy fun for all involved.

Pentecost Alley Anne Perry,2010-09-22 The murder of a prostitute named Ada McKinley in a bedroom on decrepit Pentecost Alley should occasion no stir in Victoria's great metropolis, but under the victim's body, the police find a Hellfire Club badge inscribed with the name "Finlay Fitzjames"—a name that instantly draws Superintendent Thomas Pitt into the case. Finlay's father—immensely wealthy, powerful, and dangerous—refuses to consider the possibility that his son has been in Ada McKinley's bed. The implication is clear: Pitt is to arrest someone other than Finlay Fitzjames for Ada's demise. But Thomas Pitt is not a man to be intimidated, and with the help of his quick-witted wife, Charlotte, he stubbornly pursues his

investigation—one that twists and turns like London's own ancient streets.

Enclave Ann Aguirre, 2011-04-12 New York City has been decimated by war and plague, and most of civilization has migrated to underground enclaves, where life expectancy is no more than the early 20's. When Deuce turns 15, she takes on her role as a Huntress, and is paired with Fade, a teenage Hunter who lived Topside as a young boy. When she and Fade discover that the neighboring enclave has been decimated by the tunnel monsters--or Freaks--who seem to be growing more organized, the elders refuse to listen to warnings. And when Deuce and Fade are exiled from the enclave, the girl born in darkness must survive in daylight--guided by Fade's long-ago memories--in the ruins of a city whose population has dwindled to a few dangerous gangs. Ann Aguirre's thrilling young adult novel is the story of two young people in an apocalyptic world--facing dangers, and feelings, unlike any they've ever known.
