*Rock Star/Movie Star* Landon Palmer, 2020-06-30 During the mid-1950s, when Hollywood found itself struggling to compete within an expanding entertainment media landscape, certain producers and studios saw an opportunity in making films that showcased performances by rock 'n' roll stars. Rock stars eventually found cinema to be a useful space to extend their creative practices, and the motion picture and recording industries increasingly saw cinematic rock stardom as a profitable means to connect multiple media properties. Indeed, casting rock stars for film provided a tool for bridging new relationships across media industries and practices. From Elvis Presley to Madonna, this book examines the casting rock stars in films. In so doing, *Rock Star/Movie Star* offers a new perspective on the role of stardom within the convergence of media industries. While hardly the first popular music culture to see its stars making the transition to screen, the timing of rock's emergence and its staying power within popular culture proved fortuitous for a motion picture business searching for its place in the face of continuous technological and cultural change. At the same time, a post-star-system film industry provided a welcoming context for rock stars who have valued authenticity, creative autonomy, and personal expression. This book uses illuminating archival resources to demonstrate how rock stars have often proven themselves to be prominent film workers exploring this terrain of platforms old and new - ideal media laborers whose power lies in the fact that they are rarely recognized as such. Combining star studies with media industry studies, this book proposes an integrated methodology for writing media history that combines the actions of individuals and the practices of industries. It demonstrates how stars have operated as both the gravitational center of media production as well as social actors who have taken on a decisive role in the purposes to which their images are used.

**A Brief Guide to Star Wars** Brian J. Robb, 2012-09-06 George Lucas was a rebel, refusing to make films in the style of the dying studio system, relentlessly pushing the technology of the day, and almost alone in understanding the potential of merchandising; but he was a rebel who built an empire. From the staggering unexpected success of the original Star Wars in 1977, when cinema attendances exceeded 20 million for the first time since 1963, through *The Empire Strikes Back* and *Return of the Jedi*, then the 'dark times', the 16 years leading to the blockbusting prequel trilogy - this is the fascinating story of how it all happened. Life-long Star Wars fan and movie journalist Brian J. Robb edited the official Star Wars magazine for a decade and visited the sets of *Attack of the Clones* and *Revenge of the Sith* in Australia (observing director George Lucas at work), as well as the famous Skywalker Ranch. He has interviewed many of the stars and crew of all six Star Wars movies.

**Finding a Million-Star Hotel** Bob Mizon, 2016-07-04 Bob Mizon, one of the world's best known campaigners against the veil of light pollution that has taken away the starry sky from most of the world's population, takes readers to a hundred places in the UK and the USA where the wonders of the night sky might still be enjoyed in perfect or near-perfect night skies. Visiting small hotels and simple campsites, and savoring vast dark-sky reserves where the night sky is actively protected, The Million-Star Hotel celebrates the black skies of yesteryear - which may become a reality for more and more of us as modern technology reins in lighting and puts it only where needed. How can you prepare for your stay beneath the stars? What

astronomy can you do during the daytime? What kind of equipment will you need? Questions such as these are answered, and if town dwellers return inspired – and, Bob hopes, also inspired to look with fresh eyes at their own local lighting – there is enough information here for them to equip themselves for some urban astronomy too.

The Kiloparsec-Scale Structure and Kinematics of High-Redshift Star-Forming Galaxies David R. Law, 2008-09 We study the spatially resolved properties of star-forming galaxies at redshift  $z \sim 2 - 3$  on scales  $1 \text{ kpc}$  using a combination of morphological and kinematic analyses in an effort to characterize the major mechanisms of galaxy formation in the young universe. Using a sample of 216 galaxies which have been spectroscopically confirmed to lie between redshifts  $z = 1.8 - 3.4$  in the GOODS-N field we demonstrate that rest-UV morphology (as seen by the Hubble Space Telescope) is statistically uncorrelated with physical properties such as star formation rate and is therefore unable to support the hypothesis that the prevalence of irregular morphologies indicates a high major merger fraction. Further, we present a sample of 13 galaxies observed with the OSIRIS integral field spectrograph and the Keck laser-guide star adaptive optics system which demonstrate the prevalence of high velocity dispersions  $80 \text{ km/s}$  and generally little in the way of spatially resolved velocity gradients, inconsistent with favored rotating disk models. We discuss the implications of these results for galaxy formation models, including gas accretion via cold flows and gravitational instability of early gas-rich galactic disks. There is some

evidence for a trend towards stronger rotational signatures in galaxies with more massive stellar populations.

A Lone Star Christmas Justine Davis,2019-11-07 A Christmas in Last Stand brings unexpected gifts to two very different people... Detective Sean Highwater may be one of the famous Highwaters, but he has always felt a half-step off because of the way his agile mind works. Only learning to focus has enabled him to not just survive, but thrive. Elena de la Cova is from a respected and highly regarded founding family, brought up with rather stringent expectations, but right now she is a widow trying to raise a son she doesn't understand. If Last Stand had royalty, in Sean's book it would be elegant Elena. He's willing to help her son as he had been helped, but being that close to Elena scares him to death since he's been in awe of her for years. Elena is impressed both with the way Sean gets through to her son, and with his appreciation for the Christmas customs of her culture as much as his own. Their perceptions of each other shift, but will the passion that strikes between them be enough to overcome their perceptions of themselves?

**Invincible: Star Wars Legends (Legacy of the Force)** Troy Denning, 2008-05-13 No war can last forever. Now, in the long and punishing battle between the defiant champions of the New Jedi Order and the juggernaut that is the Galactic

Alliance, the endgame is finally at hand. With so much lost—and nothing less than the course of the future still at stake—there can be no turning back. No matter the consequences. The rebel cause is losing ground under the twin blows of Admiral Gilad Pellaeon's assassination and the death of Mara Jade Skywalker. At the same time, having gained the support of the Imperial Remnant and its ruthlessly efficient forces, the Galactic Alliance, with the extraordinary power and dark brilliance of newly ascendant Sith Lord Darth Caedus at its helm, may be unstoppable. Tormented and torn between the call of duty and the thirst for vengeance, Luke has searched the Force and beheld an unspeakable vision of the galaxy enslaved under tyranny more monstrous than even Palpatine's. Now it seems that the last, best hope lies in mobilizing the scattered Jedi for one decisive search-and-destroy mission. The objective: eliminate Darth Caedus. It's a plan that will be as difficult and dangerous to execute as it is daring. For Caedus is a scion of both the Skywalker and Solo bloodlines whose command of the Force surpasses even that of his grandfather Darth Vader. There is only one who is bound by destiny to stand against him in what will surely be a duel to the death, only one with an outside chance of bringing down the dark lord who was once Jacen Solo. Failure is not an option. The furious final moments between power and peace are here, and whoever confronts Darth Caedus will decide the outcome—and the fate of those left standing. Features a bonus section following the novel that includes a primer on the Star Wars expanded universe, and over half a dozen excerpts from some of the most popular Star Wars books of the last thirty years!
