**Studying Brain Activity in Sports Performance** Stéphane Perrey, 2021-03-30 The improvement of exercise performance in sports not only involves the enhancement of physical strength, but also includes the development of psychological and cognitive functions. There is an increasing body of evidence to show that physical exercise is a powerful way to improve a number of aspects of cognition and brain function at the systemic and behavioral levels. Yet, several questions remain: What type of exercise program is optimal for improving cognitive functions? What are the real effects of certain innovative exercise protocols on the relationship between behavior and the brain? To what extent do ergogenic aids boost cognitive function? How efficient are neuromodulation techniques in relation to behavioral performance? The answers to these questions likely require multidisciplinary insights not only from physiologists and sports scientists, but also from neuroscientists and psychologists. The manuscripts published (16 research papers and one perspective article from various academic fields) in this Special Issue Book “Exercise: A Gate That Primes the Brain to Perform” bring together current knowledge and novel directions in human exercise-cognition research dealing with performance. This book showcases the various relationships between cognitive function, brain activity, and behavioral performance with applications in sports and exercise science.

*The Life Cycle of the Corpus Luteum* Rina Meidan, 2016-11-02 This book describes the life cycle of a unique endocrine gland that is absolutely essential for the establishment and maintenance of pregnancy in all mammalian species. The corpus luteum is unique because it is formed and destroyed every (non-fertile) reproductive cycle. When fertilization occurs, the corpus luteum is rescued or maintained. The processes that control corpus luteum formation, demise (luteolysis), or maintenance are just beginning to be unraveled in recent years; they involve diverse cell types and mechanisms. Some of these processes resemble tumor development—angiogenesis, for instance—but interestingly enough, this resemblance is only up to a point. The corpus luteum uses mechanisms that allow its normal, physiological growth and disappearance. Pulling together key research on the corpus luteum, this volume is of interest to both reproductive endocrinologists and comparative physiologists, with clinical relevance spanning comparative animal studies to women's health.

*Titanic Century* Paul Heyer, 2012-04-05 This book presents a revealing look at our 100-year fascination with the Titanic

disaster and the various media that have been involved in reporting, preserving, and immortalizing the event. The Titanic's fate is still very much in our collective consciousness. A catastrophe that was unimaginable at the time, now 100 years later it continues to provide lessons that we have not yet fully absorbed. And the debate continues regarding how the loss of life might have been averted—could, for example, the nearby ship, Californian, have rescued everyone on board Titanic? The book examines the relationship between a momentous historical event, the media that have been involved in reporting and re-presenting it, and the subsequent transformation of the disaster into an enduring myth in contemporary popular culture. The book will also show how the sinking of the Titanic helped make Guglielmo Marconi a household name; set David Sarnoff on the path that led to his becoming head of RCA; raised the stature of The New York Times to the eminence it has today; and helped give film director James Cameron his current notoriety and influence.

**On the Road to High-Quality Early Learning** Marjorie E. Wechsler, David L. Kirp, 2018 This timely book will help policymakers and practitioners convert their visions of high-quality early education into on-the-ground reality by providing a much-needed, richly detailed look at how states can design, fund, and manage exemplary programs. The authors describe and analyze how four states—Michigan, West Virginia, Washington, and North Carolina—have built early education systems that positively affect student outcomes. Sharing a commitment to advancing key elements of a quality preschool education, each of the states developed programs with different enrollment requirements, services, and oversight. All of them, however, rely on common overarching strategies, such as: establishing standards and supporting improvement, investing in knowledgeable educators, coordinating and aligning early education programs with elementary school, seeking sufficient funding sources and mechanisms, and building broad-based support. This book offers powerful lessons for anyone who is committed to delivering engaging, age-appropriate preschool programs for all. “This book is so valuable—it’s a ‘how-to’ for the current generation of political leaders, Republicans and Democrats alike, who want to develop early education policies and practices that work.” —James B. Hunt, Jr., former Governor of North Carolina “This book provides critical insights for addressing the key challenge to preschool policy: fulfilling preschool’s promise at scale.” —W. Steven Barnett, National Institute for Early Education Research (NIEER) “A great resource for everybody engaged in state-level processes on behalf of young children, providing valuable lessons from leading states to help other states chart their own path.” —Elliot Regenstein, Foresight Law + Policy “A detailed and fascinating account of how distributive leadership, collaboration, and professional learning can greatly and positively influence teachers’ effective use of data.” —Randi Weingarten, president, American Federation of Teachers

BBQ USA Steven Raichlen,2003-04-22 Steven Raichlen, a national barbecue treasure and author of The Barbecue! Bible, How to Grill, and other books in the Barbecue! Bible series, embarks on a quest to find the soul of American barbecue, from barbecue-belt classics-Lone Star Brisket, Lexington Pulled Pork, K.C. Pepper Rub, Tennessee Mop Sauce-to the grilling genius of backyards, tailgate parties, competitions, and local restaurants. In 450 recipes covering every state as well as Canada and Puerto Rico, BBQ USA celebrates the best of regional live-fire cooking. Finger-lickin' or highfalutin; smoked, rubbed, mopped, or pulled; cooked in minutes or slaved over all through the night, American barbecue is where fire meets obsession. There's grill-crazy California, where everything gets fired up - dates, Caesar salad, lamb shanks, mussels. Latin-influenced Florida, with its Chimichurri Game Hens and Mojo-Marinaded Pork on Sugar Cane. Maple syrup flavors the grilled fare of Vermont; Wisconsin throws its kielbasa over the coals; Georgia barbecues Vidalias; and Hawaii makes its pineapples sing. Accompanying the recipes are hundreds of tips, techniques, sidebars, and pit stops. It's a coast-to-coast extravaganza, from soup (grilled, chilled, and served in shooters) to nuts (yes, barbecued peanuts, from Kentucky).

*Headline Hollywood* Adrienne L. McLean,David A. Cook,2001 Hollywood has long been associated with scandal--with covering it up, with managing its effects, and, in some cases, with creating and directing it. In putting together *Headline Hollywood*, Adrienne McLean and David Cook approach the relationship between Hollywood and scandal from a fresh perspective. The contributors consider some of the famous transgressions that shocked Hollywood and its audiences during the last century, and explore the changing meaning of scandal over time by zeroing in on issues of power: Who decides what crimes and misdemeanors should be circulated for public consumption and titillation? What makes a Hollywood scandal scandalous? What are the uses of scandal? The essays are arranged chronologically to show how Hollywood scandals have evolved relative to changing moral and social orders. This collection will prove essential to the field of film studies as well as to anyone interested in the character and future direction of American culture. Contributors are Mark Lynn Anderson, Cynthia Baron, James Castonguay, Nancy Cook, Mary Desjardins, Lucy Fischer, Lee Grieveson, Erik Hedling, Peter Lehman, William Luhr, Adrienne L. McLean, Susan McLeland, and Sam Stoloff. Adrienne L. McLean is an assistant professor of film studies at the University of Texas at Dallas. David A. Cook is a professor of film and media studies at Emory University. He is

*Running Successful Projects* Stuart Kelly, 2012-03 Today, the voluntary sector expects and is expected to deliver high quality services that match the standard of those provided by the statutory and commercial sectors. It is vital that people who work in the sector have the appropriate skills to meet this challenge. This book is an introduction to the processes and techniques of project management. It is designed to enable project managers in the community and voluntary sectors to work in a more efficient and more effective way. It is tailored to the requirements of the voluntary sector and is designed to be easy to understand, and to concentrate on the practicalities.

*Children as Pawns* Timothy A. HACS, Timothy A Hacs, 2009-06-30 Head Start. Bilingual education. Small class size. Social promotion. School funding. Virtually every school system in America has had to face these issues over the past thirty years. Advocates and dissenters have declared confidently that the research is on their side. But is it? In the first book to bring together the recent history of educational policy and politics with the research evidence, Timothy Hacs presents the illuminating, often-forgotten stories of these five controversial topics. He sifts through the complicated evaluation research literature and compares the policies that have been adopted to the best evidence about what actually works. He lucidly explains what the major studies show, what they don't, and how they have been misunderstood and misrepresented. Hacs shows how rarely educational policies are based on solid research evidence, and how programs that sound plausible simply do not satisfy the complex needs of real children.

*Gorbachev and Bush*, 2020-05-01 This book presents and interprets archival records of the meetings between Mikhail Gorbachev and George W. Bush between 1989 and 1991, including transcripts of conversations between top leaders on the rapid and monumental events of the final days of the Cold War. Particularly effective interlocutors were the foreign ministers Eduard Shevardnadze and James Baker, especially interesting when they interacted directly with Bush or Gorbachev. The documents were obtained from the Gorbachev Foundation and the Russian State Archives and from the United States government through requests under the Freedom of Information Act. Taking place at a time of revolutionary change in Eastern Europe, stimulated in part by Gorbachev and by Eastern Europeans (the Solidarity movement, dissidents, reform communists), the Malta Summit of 1989 and subsequent meetings helped defuse any potential for superpower conflict. Each of the five summits is covered in a separate chapter, introduced by an essay that places the transcripts in historical context. The anthology offers a fascinating glimpse into the relationship that defined the last, waning years of the Cold War—a unique record of these historic, highest-level conversations that effectively brought it to a close. The quality and scope of the dialogue between these world leaders was unprecedented and is likely never to be repeated.
